Integrated ERP Solutions for Modern Business

100%	100%	24×7	∞
Implementation Success	Client Retention	Dedicated Support	Users & Customizations

What is an ERP?

"Integration" is the key word for ERP implementation.

Single System

ERP unifies all departments — Finance, HR, Manufacturing, and Warehouse — onto one integrated platform with a shared database.

Real-Time Visibility

Any department can instantly see order status, inventory levels, credit ratings, and shipping schedules — all in one place.

Eliminates Errors

No more re-keying data across systems. Orders flow automatically from department to department, reducing delays and mistakes.

How ERP Improves Business Performance

1

Customer Order

Customer places order — all info instantly available

2

Credit & Inventory

Credit rating & stock levels checked in real time

3

Auto Routing

Order automatically routed to next department

4

Dispatch & Tracking

Live tracking from any terminal in the company

5

Invoice & Revenue

Auto-generated invoice, payment & reports

Why BizSol ERP?

- 100% SUCCESSFUL IMPLEMENTATION
- 100% CLIENT RETENTION
- MOBILE APP (MIS, PRODUCTION, APPROVALS)
- BANK API INTEGRATION (HDFC, AXIS, ICICI)
- USER FRIENDLY/ NO NEED FOR ERP EXPERT
- OFFLINE TRANSACTION AUTHORIZATION
- AUTO ALERTS (EMAIL, SMS, WHATSAPP)
- 24×7 SUPPORT & UNLIMITED USERS
- COMPLETELY PAPERLESS
- EASY CUSTOMIZATION & CONFIGURATION

Key Features

- ✓ Seamless inventory & dispatch management via barcode/QR code
- ✓ Stock Audit via Mobile app

Our Modules & Solutions

Marketing & Sales

This module unifies marketing, CRM, and sales to manage the full customer lifecycle in one system. It automates lead tracking, quoting, and orders while syncing with inventory to prevent errors. This streamlined approach improves customer relations and drives faster, data-driven revenue growth.

Material Planning, Purchases & Quality

This module integrates material planning, purchasing, and quality control into one workflow. It ensures optimal stock levels and high standards through automated sourcing and inspections. This streamlined process reduces waste and guarantees consistent quality across the supply chain.

Production Planning & Inventory

This module unifies material planning, purchasing, and quality control into a single workflow. It ensures optimal stock levels and high product standards through automated sourcing and inspections. This streamlined process minimizes waste and guarantees consistent quality across the supply chain.

Finance & Accounts

This module unifies financial tracking, accounting, and reporting into one streamlined system. It automates invoicing, payments, and ledger management while ensuring full tax compliance. This centralized approach provides real-time cash flow visibility and drives better financial decisions.

Store Inventory

This module unifies stock tracking, warehouse management, and inventory control into one system. It automates stock levels, internal transfers, and bin management to prevent shortages or excess. This real-time visibility ensures accurate stock data and improves overall supply chain efficiency.

HR Management & Payroll

This module unifies employee data, attendance, and payroll into one streamlined system. It automates salary processing and tax compliance to ensure total accuracy and efficiency. This centralized approach simplifies workforce management while providing real-time HR insights.

Marketing & Sales Module

Key Capabilities

1. Improving Customer Service
2. Evaluating Sales Performance
3. Managing Marketing Activities
4. Completing the Full Sale Cycle
5. Enquiry & Quotation Management
6. Backlog & Returns Handling

Sales Order Module Provides

- Extensive Customer Information
- Pricing & Tax Definition
- Picking / Packing / Dispatch Operations
- Credit Limit Checks
- Commission Tracking & Calculation
- Late Orders & Late Shipment Reports
- Sales & Margin Analysis by Month/YTD
- Open Order Reports by Customer or Item

Material Planning & Purchase Module

Planning

Generates purchase requirements based on production plans and current stock levels

Purchase Authorization

Multi-level approval workflow for purchase orders

Purchase Ordering

Full PO lifecycle from indent to delivery tracking

Material Requirement Analysis

Item-wise and party-wise costing with detailed analysis

Vendor Rating Analysis

Quotation comparison, item-wise vendor allotment and performance tracking

GST Compliance Check

Blocks vendor payment if GST is not filed — unique compliance feature

Production Planning & Inventory Control

Gives real-time stock status in tons and numbers — helps plan production, track raw materials, and ensure material traceability.

1. **What Needs to be Created**
   Plan production runs based on orders and demand

2. **Stock Availability**
   Real-time stock in tons & numbers with ageing report

3. **Raw Material to Use**
   BOM-based consumption with zinc ratio tracking

4. **By-Products Tracking**
   Ratio of by-products generated in each production run

5. **Production Process Records**
   Full record-keeping of every process stage

6. **Material Traceability**
   Trace any material by item no. from receipt to dispatch

7. **Job Work Management**
   Track all material sent for job work externally

8. **Max/Min Production**
   Month-wise analysis of peak and minimum output

Finance & Accounts Module

★ **Unique: Auto Bank Reconciliation — just upload the bank statement and the system matches everything automatically**

Bank & Cash Books

Bank Book, Cash Book, Journal Book, Day Book

GST Suite

GSTR 1, 2, 3B, 9, ITC-04, E-Way Bill, Input Register, Daily Stock Ledger

P&L & Balance Sheet

Full financial statements with trial balance

Debtors Ageing

Track outstanding receivables with ageing analysis

Auto TDS

Auto TDS calculation and debit note generation

Voucher & Cheque Printing

Print vouchers and cheques directly from the system

Budget Control

Set and monitor budgets with variance tracking

Depreciation & Stock Valuation

Auto depreciation chart and stock valuation reports

Store Inventory & HR / Payroll

Store Inventory

- Stock Ledger & Indent Generation
- Department-wise & Item-wise Issue Summary
- Purchase Details – Vendor / Item wise
- Item Issuing Frequency Tracking
- Items not issued in last N months
- Auto-generate indents based on last month's usage
- Dept-wise consumption vs. production analysis

HR Management & Payroll

- Daily Attendance & Overtime Calculation
- Leave Allotment & Management
- Full Payroll Processing
- ESI, PF & Bonus Registers (Govt. spec)
- Monthly ESI & PF Challans
- Thumb Impression Auto Attendance
- Smart employee search (e.g. B.Tech Mechanical)
